

Odormute™ Urinal Tablets

Eco-friendly
Safe
Powerful
Low Cost!

Redesigned for the environment! Odormute™ Urinal Tablets are now made with less filler, stamped into a more compact tablet. Natural ingredients and food safe dye means an improved environment!

Exclusive Enzyme Formula urinal tablets eliminate urinal problems, safely. Powerful tablets eliminate urinal odors by *chemically changing* the source of the odor. Enzymes and helpful bacteria dissolve urinal stone and organic buildup that cause hard-to-handle problems.

Odormute™ Urinal Tablets work by actually *removing* the source of the problem – not just masking the odor. Regular use of Odormute™ Urinal Tablets will insure odor free, clean, free flowing urinals.

Designed to dissolve

Odormute™ Urinal Tablets were designed to dissolve slowly during regular flushing. In automatic flush toilets, Odormute™ Urinal Tablets dissolve in about 48 hours. There is no need to continually add more tablets, follow the Directions for Use: 1 tablet per week per urinal or 2 tablets per week in heavy traffic facilities.

Directions for Use

During the first week of use, use 1 tablet per urinal on a constant basis, replacing as needed, by placing the tablet on the urinal screen or dropping the tablet into the urinal (if no screen is regularly used). After the 1st week of use, simply use 1 tablet per urinal per week. In high-traffic washrooms in public facilities, use 2 tablets per urinal per week.

Available in 24 tablet carton or 100 tablet corrugated boxes.

Each tablet is blue in color, odorless, and measures 1 ½” in diameter by ½” thick.

Available for private label!
